I currently own Drive Genius 2 (version 2.2.1), but it came with a bootable disk that I couldn't get past the screen with Apple logo.

Jan 16, 2010 I have been debating and dodging between softwares, as I am not really sure which disk utility software is the best to use for the Mac.. It simply hangs Create a disk set using Disk Utility on Mac You can create a Redundant Array of Independent Disks (RAID) set to optimize storage performance and increase reliability in case of a disk failure.. You can also create a set that concatenates smaller disks to act as one larger disk.
